Supplemental Box

Documents D1 and D2 disclose fungicidal compounds with general formulas (see claim 1 in each document) that overlap the general formula claimed in the present application. However, the presently claimed formula I can be considered to be a selection from the general formulas disclosed in documents D1 to D4 (see claim 1 in each document) with regard to the substituent R^2 which, according to the statement of claim, can only be a substituted or an unsubstituted C_3-C_{10} -alkynyl. In documents D1 to D4, no explicitly disclosed compound carries an alkynyl substituent in this position.

The technical problem addressed by the present application was that of developing further fungicides.

By means of comparative tests using compounds from D4, the applicant has demonstrated the improved effect of the compounds according to the present application relative to certain of those known from D4, which differ by virtue of the aforementioned alkynyl substituent.
